Document visual Q&A <i>ANLS Score, test</i>	95.2% 0-shot	89.3% 0-shot	92.8% 0-shot	93.1% 0-shot

The Paradigm Shift of Artifacts

User-Model Conversation

User and AI model talking back and forth in a discussion

User-Model Collaboration

User and AI model collaborating on a creative product in real-time via discussion

What are Artifacts?

Appear in a window alongside the chat

Allow users to build documents, websites, and applets in real time

Can be iterated, downloaded, and published to the web

Claude

Greeting and Assistance

Share

Good afternoon.

Good afternoon! How may I assist you today?

Generate an artifact of a smiling cartoon character.

Smiling Cartoon Character SVG
Click to open image

I've created a simple SVG image of a smiling cartoon character for you. Here's a description of the character:

1. The face is a yellow circle.
2. It has two large white eyes with black pupils.
3. There's a wide, curved smile at the bottom of the face.

The character has a cheerful, friendly appearance. Is there anything you'd like me to modify or explain about this cartoon character?
